“

ICATAP is at the forefront of cutting-edge training. Our system of education puts our healthcare partners in the driver's seat in building a trained workforce.

Once ICATAP training is completed, apprentices will be qualified to sit for their board exams and become certified.

”

ICATAP is registered with the Minnesota Department of Higher Education.

Industry Driven ■ Industry Tested ■ Industry Approved

The ICATAP Difference

ICATAP apprenticeships bring education to your facility and support a full partnership where you select and facilitate training customized to your needs.

Introduction

Why Choose ICATAP?

The ICATAP system was developed through many years of higher education experience assessing and refining successful methods of instruction.

ICATAP Instructor-led academics layered with daily on-the-job skill development provide an in-depth experience that even accelerates the learning process. This is immersive education at its best.

Immersive learning in the ICATAP style is high-impact. Evidenced over 3 years and now in 27 locations in Minnesota and Wisconsin, clinics and hospitals partner with ICATAP to work a bit outside their comfort zones to make a positive difference in their workforce.

The authentic nature of the learning scenario and the opportunity for apprentices to operate with higher levels of autonomy and agency than they are likely afforded in non-immersive learning experiences.

Service & Provide

What We Can Do

ICATAP brings education that meets industry standards to ensure organizations can provide the best in healthcare to its patients.

- ✓ Cost effective training
- ✓ Meets healthcare standards
- ✓ Customized to your needs

Medical Team
